RENEWABLES

Efficient, eco-friendly heating solutions using the latest in sustainable technology.

UNDERFLOOR HEATING

Comfort and performance beneath your feet, even heat distribution for every room.

PRESS FITTINGS

Reliable, time-saving pipe connections with secure, leak-free results.

Renewables

Efficient, eco-friendly heating solutions using the latest in sustainable technology.

Reliable, Low-Carbon Solutions for Modern Heating Systems

Heat pumps are becoming the preferred choice for renewable heating in both domestic and commercial settings. By extracting energy from the air or ground, they provide consistent warmth with lower carbon emissions and reduced running costs compared with gas or oil systems.

AIR SOURCE HEAT PUMPS (ASHPs)

ASHPs draw heat from outdoor air and typically achieve SCOP ratings between 3.0 and 4.5. They're well suited to refurbishment projects, with most units operating efficiently down to -15°C. Compact footprints, inverter-driven compressors and user-friendly controls allow smooth integration with underfloor heating or low-temperature radiators.

GROUND SOURCE HEAT PUMPS (GSHPs)

GSHPs use buried pipework - either horizontal ground loops or vertical boreholes, to access stable subterranean temperatures. Offering SCOPs above 4.0, they're ideal for new builds and larger plots. Closed-loop glycol systems ensure dependable performance across varied ground conditions.

HEAT PUMP CYLINDERS

Optimised for low-temperature systems, heat pump cylinders store and deliver heat efficiently, ensuring hot water is available on demand. Well-insulated and compatible with underfloor heating, low-temperature radiators, and solar panels, they support system performance, reduce energy losses, and allow flexible integration with a variety of heat pump setups.

COMPLIANCE & SYSTEM INTEGRATION

Most models are MCS-accredited, compliant with Approved Document L, and align with SAP requirements, qualifying them for funding through schemes like the Boiler Upgrade Scheme (BUS). Integration with thermal stores, buffer cylinders and smart controls, including weather compensation, load modulation and zone regulation enhances system responsiveness and overall efficiency. Hybrid configurations can provide additional flexibility on high-demand installations, especially in larger properties or multi-zone setups.

ALTHERMA ASHP RANGE

Altherma H Hybrid

Hybrid technology combining condensing gas and air-to-water heat pump for heating and hot water.

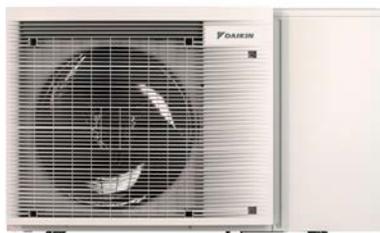

- Heating only models
- Depending on outdoor temperature, energy prices and internal heat load, the Daikin Altherma H Hybrid heat pump always selects the most economical mode to operate
- Low investment cost: no need to replace the existing radiators (up to 80°C) and pipe work
- Provides sufficient heat in renovation applications as all heat loads are covered up to 32kW
- Easy and fast installation thanks to the compact dimensions and water connections.

SIZE	PRICE
4 Outdoor EJHA04AV3	£1810.43

Altherma 3 Monobloc

The Daikin Altherma 3 Monobloc is now available in low and high capacity models, ranging from 4-16 classes. Both models feature the latest controls and low environmental impact R-32 technology.

- Operates down to -25°C, delivering 60°C water at -5°C (low capacity) and -7°C (high). Available in 4 -16kW models with a compact, single-fan design.
- Modern and discreet: high capacity units feature a sleek black grille; low capacity models come in ivory white with a quiet, low-profile finish.
- Outdoor-only unit with integrated hydraulics—no indoor unit required. Heating-only system with backup heater included on high capacity models; optional on low.
- Uses low-impact R-32 refrigerant. Compact size meets permitted development rules. Simple to install with smart controls and setup wizard.

Altherma 3 Low Temperature R-Split

Designed for year-round comfort, the system ensures reliable operation even in extreme cold, with performance guaranteed down to -25°C. The outdoor unit continues extracting heat from the air, even in harsh winter conditions.

- Built-in WLAN module allows remote operation via smartphone, tablet, laptop, or PC.
- The Daikin Onecta app (optional) enables easy control of temperature and settings from any location.
- Compatible with voice control for added convenience.
- Uses R-32 Bluevolution refrigerant, reducing environmental impact by up to 68% compared to R-410A.
- Requires up to 16% less refrigerant, lowering both environmental footprint and operating costs.
- Advanced inverter technology ensures high energy efficiency and reduced energy consumption.

Pre-Plumbed R-32 Cylinder

These pre-plumbed cylinders reduce heat loss, offer hydraulic separation with a 20L buffer vessel, and include all components for quick installation and optimal performance.

KEY FEATURES

- Plug & play with all key hydraulics included for fast installation.
- Ideal pairing with Daikin Altherma Monobloc.
- Optional wiring box for separate connections and immersion heater power supply.
- Includes pump and 50L (or 25L slimline) buffer vessel for hydraulic separation.
- Slimline model saves floor space—perfect for smaller homes.
- Built-in buffer vessel, pump, and magnetic filter ensure top performance.
- Supplied pre-fitted with buffer vessel/hydraulic separator, G3 kit (expansion vessel supplied loose), wiring box, diverter valve, on board pump, magnetic filter, automatic air vents and immersion heater.

AIR CONDITIONING UNITS

Enjoy year-round air conditioning with the Daikin air-to-air heat pump, delivering efficient cooling in summer and heating in winter. Designed for energy efficiency, it achieves A+++ performance using low-impact R32 refrigerant, drawing up to 80% of its energy from the air. Advanced inverter technology reduces electricity use by up to 30%, saving energy without compromising comfort. The system includes a high-wall indoor unit that delivers cooled, filtered air and a compact outdoor unit that releases heat, offering a simple, reliable, and eco-friendly solution for every season.

Air conditioning units may only be sold to F-Gas registered engineers. Proof of registration will be required prior to purchase.

Compress 2000 AWF

The CS2000 AWF is an all-in-one monobloc heat pump solution, designed to simplify and speed up installation. With a compact 2 m² footprint, it's ideal for smaller outdoor spaces, perfect for both renovations and new builds.

- Quick and easy installation – Full monobloc system with one outdoor unit and no indoor unit required.
- No F-Gas qualification needed – Simplifies compliance and installation process.
- Integrated HMI Master Controller with temperature sensor for zone control.
- High-performance R32 refrigerant (GWP 675) – efficient and environmentally safer.
- Delivers flow temperatures up to 65°C.

AIR CONDITIONING UNITS

Worcester Bosch air conditioning systems feature two main components: an indoor unit, installed high on a wall to remove warm air and deliver cooled, filtered air, and an outdoor unit, mounted on a roof, balcony, or wall to release heat and draw in cooler air. They provide rapid heating or cooling for individual rooms, filter out up to 95% of dust, smoke, and pollen, and circulate air with directional fans. With low-humidity cooling, silent mode for better sleep, and energy-efficient settings, they deliver year-round comfort and can be controlled remotely via the optional HomeCom app.

Air conditioning units may only be sold to F-Gas registered engineers. Proof of registration will be required prior to purchase.

Logic Air DHW Pre-Plumbed Heat Pump Cylinders

These energy-efficient, pre-plumbed hot water cylinders are purpose-built for use with air source heat pumps, offering quick installation, durable insulation, and reduced carbon emissions. Available in single or dual-zone configurations, they suit a range of property sizes from small households to light commercial settings. The dual-zone option includes a low loss header for enhanced thermal performance and zoning flexibility, while both models deliver reliable, sustainable hot water with streamlined control and modern compatibility.

Features:

- Automatic Air Vent(s)
- 3kW Immersion
- Flow & Return Thermistors
- Outdoor Sensor
- Compatibility varies depending on the heat pump outdoor unit

* Performance data in accordance with EN 14825 : 2016, EN 12102-1 :2022, EN 14511 : 2018. The energy efficiency provided may not correspond to the actual energy once installed in a building, as the efficiency is influenced by other factors such as heat loss in the distribution system and the capacity of the products in relation to building size and characteristics.

AERONA AIR SOURCE HEAT PUMPS

Grant's air-to-water heat pumps offer a low-carbon, high-efficiency alternative to fossil fuels. Aerona³ models use R32 refrigerant, delivering excellent SCOPs in a compact, quiet design. Aerona 290 models use sustainable R290 refrigerant, pairing modern looks with Grant's latest high-performance technology.

Aerona³

The Aerona³ R32 range includes four single-phase models: two single-fan (6kW, 10kW) and two twin-fan (13kW, 17kW), delivering heating and hot water with high efficiency, even in low temperatures. Compact, quiet, and Keymark approved, it offers a cost-effective renewable alternative to off-gas heating.

KEY FEATURES:

- GWP 675 (70% lower than R410A)
- Built-in weather compensation & frost protection
- Connect & Notify approved (6kW, 10kW, 13kW)
- 7-year guarantee for G1 Installers (with training)

17kW HPID17R32BODY	£3957.10

Aerona 290

The Aerona 290 range offers five single-phase models: three single-fan (4kW, 6.5kW, 9kW) and two twin-fan (12kW, 15.5kW). Rated at -5°C air temperature and 55°C water flow, each unit uses efficient R290 refrigerant with excellent thermodynamic properties. Finished in a stylish, durable black casing, the Aerona 290 delivers sustainable, effective heating and hot water

KEY FEATURES:

- 7-year guarantee for G1 Installers (with training)
- MCS certified, funding eligible, Connect & Notify approved
- Quiet Mark certified with sound insulation
- Smart Controller compatible for remote setup/diagnostics
- Built-in pump, compressor, expansion valve & safety features
- Anti-freeze protection & efficient condensate drainage

30 Litre External Volumiser c/w 3Kw Backup Heater

30-litre external volumiser for use where an internal unit isn't feasible. Sits behind the heat pump to increase system volume, and is weatherproof, insulated, with a 3kW heater and relay and is designed for use with the R32 range only.

£364.65

HPIDVOL30EXT

Aerona³ Smart Controller Kit

The Aerona Smart Controller works with Aerona³ and Aerona 290 heat pumps, using advanced technology to optimise performance, cut energy use, and enable flexible on-site or remote control.

KEY FEATURES:

- 4.5" colour touchscreen in sleek black casing
- Programmable heating & hot water schedules
- Simple menu with visual system diagrams
- Remote control via app or web (Hub required)
- Weather-compensated for maximum efficiency
- Compatible with wired/wireless thermostats
- Built-in setup & monitoring assistants

Quick Recovery (QR) Single Coil Cylinder

Grant's QR single coil cylinder offers fast heat-up times, excellent efficiency, and seamless compatibility with oil boilers, air source heat pumps, and solar thermal systems. Suitable for open or unvented setups, it's a reliable hot water storage solution.

KEY FEATURES:

- 25-year cylinder shell guarantee (T&Cs apply)
- 22mm compression connections
- No anode required; clearly labelled tappings
- Supplied with unvented kit and 3kW immersion heater
- Fast-recovery stainless steel coil and high-grade insulation
- Optional plinth accessory available (MB-24)
- Low environmental impact: GWP 3.1, ODP 0

Pre-Plumbed - Single Coil

Cyclone High Gain Indirect Cylinders

The unvented cylinder is designed to work with any air-to-water heat pump. It draws energy from the heating system and heats the water through a high-efficiency coil. The UK Cyclone model is compatible with all major heat pumps on the market and integrates especially well with a complete system from the same range.

- Manufactured from high grade Duplex stainless steel
- Fitted with Branded Quality Components
- Works with Air Source Heat Pumps

SIZE	PRICE

SmartPlumb Kodiak Indirect Cylinders

The SmartPlumb Kodiak by Joule is an innovative pre-plumbed solution for heat pump systems, featuring a next-generation compact Pre-Plumbed pack that controls heat distribution to each zone. Its unique, patented modular zonal control manifold optimises heating and hot water systems, with a hydraulic layout designed for efficiency and installer convenience, providing easier access and faster installation.

The range includes a slim indirect cylinder, ideal for smaller spaces or areas with limited access, allowing for a quick and straightforward installation.

- Designed to work specifically with Samsung R32 Monobloc heat pumps, ensuring compatibility and optimal performance

IntaKlean HP Magnetic Heat Pump Filter 28mm

Designed to protect air source heat pump systems from costly breakdowns, this filter captures both magnetic and non-ferrous particles. A rare earth neodymium magnet works with a 300-micron stainless steel fine filter to force debris into the filter, where it breaks down, settles at the base, and traps remaining magnetic material.

KEY FEATURES:

- Filters magnetite and non-ferrous debris
- Direct flow to core for maximum capture
- 300-micron multi-layer mesh
- Low-profile drain valve
- Removable 11,000-gauss magnet for live servicing
- 360° rotation for easy access
- Full-bore isolation valves
- Manual air vent

Pre Insulated Hoses - 2 Pack

Part L of building regulations requires external pipework on air source heat pumps to be fully insulated. Inta's pre-insulated hoses, supplied in pairs for flow and return, reduce heat loss and maintain efficiency. They offer direct connection options, extra insulation for connections, and a waterproof, UV-resistant finish for all-weather durability.

HEAT PUMP INSTALLER PACKS

These installer packs provide everything needed for a smooth, hassle-free external installation.

The 28mm pack includes adaptors to reduce the heat pump's rear connections from 1 1/4" to 1", making it ideal for Vaillant systems under 10kW. Each pack also contains compression anti-freeze valves, extended ball valves, and a copper-to-male iron adaptor, designed to create neat, side-by-side connections without awkward hose bending.

28mm Installer Pack

- 2x Heat Pump Ball Valve 28mm
- 2x Ball Valve Insulation
- 2x Zero Anti-freeze Valve 28mm
- 2x Anti-freeze Insulation
- 2x Anti-vacuum Guard
- 1x Heat Pump Hose with Elbow 500mm (Pack of 2)

Underfloor Heating

Underfloor heating delivers primarily radiant warmth, the most comfortable form of heating, providing an even and consistent temperature throughout the entire room.

Reliable, Low-Carbon Comfort for Modern Heating Systems

Fully compatible with conventional boilers and both air and ground source heat pumps, it offers flexible, low-carbon heating for modern homes and commercial spaces.

SMART ROOM CONTROL

Intelligent thermostats communicate with a central wiring centre, sending heat to each room only when needed.

OPTIMISED WATER TEMPERATURE

The manifold blends water to the ideal temperature for underfloor heating, ensuring efficient performance with any heat source.

SEAMLESS SYSTEM INTEGRATION

Compatible with thermal stores, buffer tanks, and smart controls, including zone regulation and load modulation, underfloor heating maximises comfort, efficiency, and flexibility, even for larger or multi-zone properties.

DESIGN & SPECIFICATION SUPPORT

Our in-house team provides full layout design, heat loss calculations and material schedules to ensure every underfloor heating system is correctly sized and optimised. Clear installation drawings and product lists make ordering simple and help installers deliver efficient, compliant systems with confidence.

Small Area Pump Mixer

Designed for use on small rooms or extensions, provides temperature controlled mixed water to underfloor heating systems with a heat output of up to 3kW, satisfying underfloor heating areas up to 40 sqm. With 6 meter Bastion pump assembled. G/2" tappings for easy connection.

Thermal Perimeter Edge Strips - Expansion Foam

High-performance perimeter edge strips provide a thermal break around heated floors and accommodate expansion and contraction of screeded floor finishes. Available as closed-cell polyethylene foam rolls, with optional bonded PVC apron or self-adhesive backing. Proper installation also supports improved thermal performance to meet U-value and Part L regulations.

FEATURES & BENEFITS:

- Lightweight & easy to install
- 100% recyclable. Zero VOC's, Zero CFC's, Zero ODP's – GWP <5
- Multiple widths & lengths
- Enhances floor thermal performance

Fibre Reinforced Gypsum Board

Reinforced gypsum CNC-routed panels for optimal underfloor heating in new builds and refurbishments. 100% dry system, ready for any floor finish within 24 hours, much faster than wet alternatives.

FEATURES & BENEFITS:

- Fast, efficient heat transfer
- Fits 10, 12, 16mm pipework
- High heat retention
- Optional acoustic system for separating floors
- CNC routing: straights, circles, radius, universal
- White finish

Foil Faced Chipboard

CNC-grooved chipboards for efficient underfloor heating, available in 1200mm and 2400mm lengths with optional foil facing. Ideal for residential, care homes, offices, and timber joisted floors with minimal height impact.

FEATURES & BENEFITS:

- High heat output with foil and pipe centre options
- Structurally tested to BS:EN1195
- Faster response than traditional fit-from-below systems
- Aluminium/Silver finish

Routed Extruded Polystyrene (XPS) Board

Insulation boards with UFH pipe channels, offering 300kPa compressive strength from 18mm thickness. Suitable for new build, refurbishment, residential, commercial, and offsite projects.

FEATURES & BENEFITS:

- High thermal performance, optional foil facing
- Fits 10, 12, 16mm UFH pipes, multiple thicknesses
- Ultra-high compressive strength & heat transfer
- Can integrate into acoustic systems for separating floors

UNDERFLOOR HEATING DESIGN SERVICE

Precision planning for maximum comfort & efficiency

Installing underfloor heating is an investment in comfort and energy efficiency. But to get the very best results, a carefully planned design is essential. That's where we come in.

What we provide

Our professional design service gives you everything you need for a smooth installation:

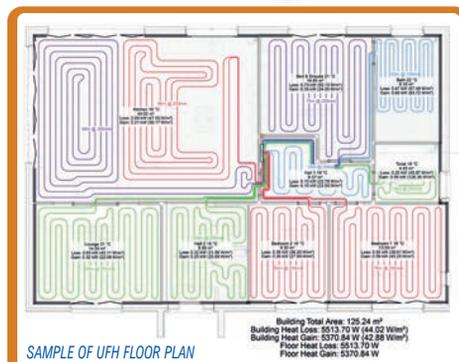

- **Room-by-room layout drawings** – clear, accurate pipe layouts tailored to your space
- **Material calculations** – exact quantities of pipework, manifolds, and fixings, reducing waste and saving money
- **Heat loss considerations** – ensuring your system is powerful enough for each room
- **Installation-ready plans** – easy-to-follow designs that installers can work from with confidence

Why choose a design service?

- **Save time** – no guesswork or last-minute changes on-site
- **Save money** – order the right amount of materials, no more, no less
- **Peace of mind** – know your system will run at optimum efficiency from day one
- **Professional finish** – ensure a reliable and consistent heating performance

Let us design the warmth beneath your home - speak to your local branch or visit our website for more details.

tuckerfrench.com

Who It's For

- **Homeowners** planning a self-build or renovation
- **Builders and contractors** looking for ready-to-use plans
- **Installers** who want an accurate materials list and layout drawings

Make your underfloor heating project simple, efficient, and stress-free!

Quantum Room Thermostats

The Quantum thermostat range combines sleek design, smart connectivity, and versatile installation options to deliver precise, convenient heating control for modern homes. Whether you choose the hard-wired or wireless model, it integrates seamlessly into the SALUS Smart Home system and adapts to a variety of applications.

Key Features:

- Ultra-slim profile at just 10mm thick
- ZigBee 2.4 GHz communication for reliable integration
- Local or remote control via smartphone, tablet, or PC
- Long-life rechargeable lithium battery (wireless models)
- Advanced functions for accurate temperature management

Smarthome Wireless Digital Thermostat 230V

A versatile 4-in-1 wireless controller that can function as a programmable thermostat, group controller, or hot water timer. Designed for integration with underfloor heating systems and thermostat heads, it provides flexible operation with both manual and automatic options.

Key Features:

- Heating and cooling modes
- Three temperature levels: comfort, standard, economical
- PARTY and VACATION modes for temporary adjustments
- Output for additional floor temperature sensor
- Manual control (permanent or temporary)
- Memory backup to retain settings after power outages

NeoHub Internet Gateway Hub G2 230V

The NeoHub is ideal for medium to large homes. It connects directly to your broadband router and uses Radio Frequency (RF) to communicate with all Neo devices. Once installed and configured through the Neo App, you can manage heating, hot water, and connected devices seamlessly from anywhere.

Key Features:

- **Enhanced Control** – Smarter response with accessories.
- **Comfort & Efficiency** – Optimised heating and energy savings.
- **Remote Updates** – Automatic firmware updates.
- **Scalable Heating** – Up to 32 zones with flexible schedules.
- **Mesh Networking** – Stable, extended-range communication.
- **Smart Home & Geolocation** – HomeKit compatible; adjusts by location.
- **Open JSON API** – Enables third-party integration.

Press Fittings

Press fittings make pipe installation straightforward by providing consistent, high-quality joints across a range of materials, even in confined or awkward spaces, while reducing maintenance and ensuring lasting reliability.

Fast, Reliable Connections for Modern Heating Systems

Press fittings provide a clean, efficient and flame-free method of jointing, saving time on site while ensuring durable, leak-free performance across a wide range of applications.

PRESS FITTINGS

Strong and dependable connections for heating, cooling and potable water, available in multiple sizes and materials for domestic and commercial use.

INSULATED PIPE

Flexible, lightweight and pre-insulated to reduce heat loss, suitable for both above and below ground services, including renewable system connections.

PRESS FITTING TOOLS

Ergonomic, battery-powered tools with interchangeable jaws deliver fast, precise installation, even in tight spaces.

Pre-Insulated MLCP Coil Pipe

This pre-insulated MLCP coil pipe is WRAS approved and ideal for heating applications. Its advanced insulation ensures thermal efficiency, while the durable, flexible design resists corrosion and oxygen diffusion. Fire rated to BS EN13501-1 (BL-S2-D0 for insulation, E for full assembly), it's a cost-effective, easy-to-install solution for residential and commercial use.

ROTHENBERGERSCAN TO
LEARN MORE**Romax Compact 3.0 Bluetooth Enabled Press Tool & M Profile Jaw Set 15-22-28mm**

Lightweight and efficient, this press jaw set is built for professional pipe fitting. Weighing just 2.5 kg with a balanced 34 cm body, it delivers comfort during extended use. A powerful 19 kN piston force and rapid 3-second cycle handle fittings up to Ø35 mm (metal) and Ø40 mm (plastic). Real-time data can be tracked via the ROTHENBERGER App, while its robust design performs reliably from -10°C to 60°C.

The set includes M15-22-28 mm jaws, 18V 2.0Ah Li-HD battery, charger, and manual, a complete, ready-to-use solution.

FEATURES:

- Real-time data via ROTHENBERGER App
- 3-second press cycle with effective pressure build-up
- 19 kN piston force for fittings up to Ø35 mm (metal) / Ø40 mm (plastic)
- Perfectly balanced, ergonomic design
- Compact and lightweight (2.5 kg / 34 cm)

SPECIFICATIONS:

- Voltage: 18 V
- Working range: Ø12–40 mm
- Operating temperature: -10 to 60 °C
- Battery: 18V Li-HD, 2.0Ah (CAS system)
- Press cycle: 3 sec
- Jaw system: Compact

Get MCS Certified - The easy way!

MCS (Microgeneration Certification Scheme) sets the standard for low-carbon technologies and the companies installing them. To obtain MCS certification for heat pump installations, the product and installation must meet strict criteria.

At Tucker French, we make this simple: our Umbrella Scheme takes the stress out of compliance, covering everything from design and documentation to commissioning and certification, so your projects are fully MCS approved, seamless, and reliable.

WHAT WE PROVIDE

- ✓ Accurate room-by-room heat loss
- ✓ Ofgem grant applications managed
- ✓ ASHP DNO submissions simplified
- ✓ Optimised system performance
- ✓ Full MCS handover packs
- ✓ 2 & 5-year warranties for peace of mind

Find out more today - speak to your local branch or visit our website for details.

Fast. Compliant. Hassle-free!

tuckerfrench.com

Design

The first step is to understand your specific requirements and review the site conditions. Using the latest MCS standards, room-by-room heat losses are calculated to guarantee optimum efficiency and performance for the client.

Compliance

All necessary documentation, including system specifications and compliance certificates, is taken care of, making the commissioning process seamless and transparent.

Commission

Working closely with your installation teams, we ensure each system is thoroughly tested and validated for peak performance. We also provide expert guidance on system management and maintenance, setting your client up for long-term success.

Maloney's Sustainable Home Centre

Our dedication to sustainable energy is exemplified through the Daikin Sustainable Home Centre. Homeowners nationwide are seeking greener heating solutions for their homes. The Sustainable Home Network program provides customised solutions for businesses of all sizes, regardless of their stage in adopting renewable heating practices.

In partnership with Daikin and Tucker French, Maloney's proudly operates a Sustainable Home Centre in Epsom. Our showroom features renewable heating, hybrid solutions, and air purification technologies, alongside a fully operational training facility supporting installers with low-carbon expertise.

Installers can register for the Daikin Monobloc Level 1 Training Course by speaking with the branch manager or emailing marketing@tucker-french.com
