radbot 1 The intelligent thermostatic radiator valve

7
years
no quibbles
warranty

NEW

radbot 1 is the next generation of intelligent heating controls that saves money off your heating bills compared to a manual TRV.

Radbot 1 works by monitoring changes in light and humidity, which it uses to build a pattern of occupancy. It then heats each room when you're there and automatically lowers the temperature when you're not, saving money and energy.

No need for apps, smart thermostats, setting up schedules or engineers visiting your home. Install, set and forget.

£32.90

RADBOTH0

Pack Contents 1 x Radbot Device, 5 x Valve adaptors: M30 x 1, M30 x 1.5, M28 x 1.0, Danfoss RA, Danfoss RAVL & 2 x 1.5 AA batteries

Easy installation

Simple replacement for standard thermostatic radiator valves (TRVs).

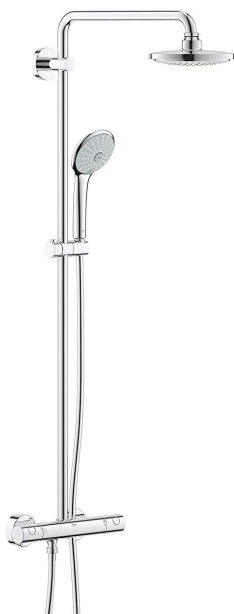

Comfort boost button

Provides 30 minutes of maximum heat.

Find out more at: www.securemeters.com/radbot
